§.0 Examiner's Statement of Reasons for Allowance:

Upon reconsideration of the reference to Lubbe et al [US 6,111,965] (hereafter Lubbe), it is noted that Fig. 1 depicts a signal processing circuit connectable selectively with one of several audio signal sources, which may be a stereo decoder, an AM signal source, a cassette recorder and a compact disc player. It is further noted that an interruption in audio signal processing occurs temporarily upon a swichover between two signal sources, during which the signal processing circuit is usually switched into a mute state. Since this signal processing circuit is presumed adequate for compensating transient signals due to the swichover, and no deficiency or need for using an accumulator is disclosed by Lubbe, it is agreed that no motivation exists for using an accumulator in the signal processing circuit of Fig. 1 of Lubbe et al.

The claims have been re-numbered as follows:

CLAIMS NUMBER (ORIGINAL)	CLAIMS NUMBER (FINAL)
1-4	1-4
13-15	5-7

Claim no. 1 along with figure number 3 will be published in the Official Gazette.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Allowance".
